

### BENEFITS

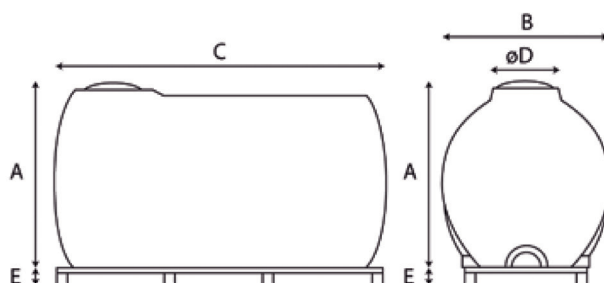

- Tank molded in one piece, without bonding or welding and therefore perfectly waterproof
- Excellent shock resistance, high strength
- Inside surface prevents deposits and facilitates cleaning
- Niche in the lower part before protecting the valve.

### PURPOSE :

- Storage tanks have been designed for all problems of air storage and intra-site liquid transport.
- The surface of the support must be flat and solid.
- Very simple maintenance, a rinse allows to clean the tank.
- Designed for the storage of all food and chemical products (see compatibility table).

### DESCRIPTION

- Rotation-molded flat-bottomed single-piece tank made of UV stabilized high density polyethylene
- Biennial guarantee. The tank has a guarantee corrosion of 20 years.
